

## Rejuvi Fruit Complex Treatment

Most alpha-hydroxy acid treatment formulas on the market are glycolic acid solutions with a concentration between 20% to 35% for salon use. These products are merely different in concentration and degree of buffering. The traditional glycolic acid formulas have a number of weaknesses such as limited effectiveness, skin irritation/discomfort during application and skin dryness.

Rejuvi Fruit Complex is an innovative technology incorporating several different alpha-hydroxy acids including beta-hydroxy acid with the following major benefits:

- a) Enjoy the extensive benefits of various alpha-hydroxy and beta-hydroxy acids
- b) Fruit Complex utilizes acids and their corresponding esters to achieve excellent safety and comfort levels during treatment
- c) Fruit Complex incorporates a unique lipoceutical vehicle (liposome-like delivery system) to minimize skin irritation and skin dryness

Rejuvi Fruit Complex is available in versions I and II. Version I is comparable to traditional 25% glycolic acid solutions. Version II is comparable to traditional 35% glycolic acid solutions. Higher strengths are also available to dermatologists upon request. Fruit Complex is a basic Rejuvi treatment with extensive applications such as smoothing skin, reducing pores, diminishing wrinkles, etc. Often time Rejuvi Fruit Complex Treatment is incorporated with various other Rejuvi professional treatments.

### **Treatment Products Required:**

1. Rejuvi Fruit Complex #1
2. Rejuvi Fruit Complex #2

### **Other Products Needed:**

1. Rejuvi "k" Facial Cleanser
2. Rejuvi "r" Skin Refreshner
3. Rejuvi Purifying Mask
4. Rejuvi "h" Skin Healing Gel
5. Rejuvi "v" Nourishing Cream or "b" Skin Moisturizer or "n" Night Cream

### **Ingredients:**

#### **Rejuvi Fruit Complex #1 or # 2:**

*deionized water, ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.*

## Rejuvi Fruit Complex Treatment

### Treatment Procedures:

1. Cleanse the skin thoroughly with Rejuvi "k" Cleanser twice, then dry.
2. Using a cotton pad, apply Rejuvi "r" Skin Refreshener – pat on then allow to dry.
3. Apply Rejuvi Purifying Mask mixed with "h" Skin Healing Gel (3:2 ratio). Leave on 6-8 minutes to dry and then rinse off thoroughly.
4. Shake Rejuvi Fruit Complex #1 or 2 well (make sure the solution is uniform to ensure even distribution of liposomes) & pour an appropriate amount of Fruit Complex into a cuvette or tiny vessel.
5. Using a brush, apply the Fruit Complex over the area to be treated on the face and neck - allow to remain on the skin 1-5 minutes depending on skin sensitivity. Keep a close eye on the client to make sure skin doesn't get too red. If significant discomfort develops, rinse off immediately with cold water and apply Rejuvi "h" Skin Healing Gel to calm the discomfort level.
6. Remove Fruit Complex by washing several times with soft cosmetic sponges or a cool, damp towel.
7. Apply Rejuvi "h" Healing Gel and massage into the skin gently for 2-5 minutes.
8. Apply Rejuvi "v" Nourishing Cream or other Rejuvi Moisturizer.

If doing a full facial treatment, apply Fruit Complex treatment before steam and extractions and usually before a facial massage. Rejuvi AHA treatments can be done once a week depending on the skin condition. One treatment period usually involves 4-6 treatments. It is wise to start with a lower strength to cautiously assess your client's skin type and tolerance as well as determining the retention time of the Fruit Complex Treatment. In the case of very sensitive skin, Rejuvi "c" Skin Care Formula (equivalent to 10% strength) may be used to substitute for Fruit Complex #1.

### Home Care Program:

**Morning:** "x"-cell Vitamin C Complex, "b" Skin Moisturizer, "s" Facial Sun Block

**Evening:** "x"-cell Vitamin C Complex, "g" AHA Cream or "g" AHA Serum (for oily skin).
